

Remember Climate Change

The Ecological Footprint of the UK
is nearly three whole Earths.

That means that if the rest of the world
had the same lifestyle as we do
3 whole Earths would be needed
to provide the resources we consume
and absorb our waste.

*We are all responsible,
one way or another.*

Remember Responsibility

Not an election leaflet, not supporting any political party.
Prepared + published by A.B. 24 Penrith CI, WA6 7ND

Climate change is still happening

threatening our children, grandchildren
and many in poorer parts of the world

- and now us.

Net Zero may be flawed,
but it is the best expression so far
of how nation and people
can take responsibility for the future.

And, No!, Net Zero need not
wreck our economy

(What does wreck economies is
greed, arrogance and unconcern about
disasters that climate change brings.)

Remember Responsibility

- and you'll feel better.
